Somerville, MA • [bricknj.github.io](https://github.com/bricknj)

Professional Summary: Mechanical engineer with 9+ years of product development, robotic, and medical design experience; interested in developing electronic and controls skills; seeking multidisciplinary opportunities

PROFESSIONAL EXPERIENCE

Senior Mechanical Engineer | [NK Labs](#) | Cambridge, MA

Jun 2017 – Present

Mechanical Engineering

- Engaged in electromechanical projects through full prototype design process: system architecture, concept development, detail design, multiphysics simulation, fabrication, assembly, debug, and testing
- Designed custom parts for a wide range of applications, industries, and client companies
 - DFM: Multi-Axis Machining, Waterjet, Rapid Prototyping, Extrusion, MIG / TIG Welding, Injection Molding
- Produced technical drawings, interfaced with machinists, implemented GD&T practices
- Devised and conducted experimental test procedures
- Collaborated with electrical design team to determine PCB mechanical layout, connectors, clearances, etc.
- Led technical project of smart camera vision system from concept through environmental testing
- Created mechanisms and housings for mobile, soft, and industrial robots, AUVs, and novel actuators
- Developed automated multi-axis test rig for light-sensitive electronics and wrote MATLAB control software
- Overhauled design of high-vacuum chamber in fusion energy experiment for ease-of-access and assembly, particle permeability, vacuum compliance, wire routing, and existing geometric constraints
- Coordinated directly with clients, manufacturers, vendors, testing facilities, etc. domestically and globally

Business Development, Operations & Recruitment

- Served as main point of contact for prospective client companies and evaluated projects for feasibility
 - Managed project leads, organized internal teams, drafted project proposals and grant applications
 - Led hiring process for co-op and full-time staff: filtered resumes, ran interviews, and checked references
 - Planned and executed team morale events: birthdays, after-work bicycle rides, holiday bake off
 - Hosted company booths at US Dept. of Energy ARPA-E Summit, BIOMEDEVICE Expo, and career fairs
-

Advanced Systems Mechanical Engineering Co-op | [Boston Engineering](#) | Waltham, MA

Jan – Jun 2016

- Created complex parts and assemblies for AUV and robotic systems using PTC Creo and Windchill PDM
 - Learned and applied basics of circuitry and soldering to assemble functional electrical prototype systems
-

Mechanical Engineering Co-op | [Farm Product Development](#) | Hollis, NH

Jan – Jun 2015

- Worked on design projects for clients across the biomedical industry from brainstorming to full-scale prototypes
 - Performed FEA using ANSYS Workbench and SolidWorks Simulation to determine necessary part geometry
-

Research & Development Co-op | [LeMaitre Vascular](#) | Burlington, MA

Jan – Jun 2014

- Designed, modeled, and made drawings of parts and fixtures for biomed R&D and production in SolidWorks
 - Conducted device and component testing on samples across many of company's surgical product lines
-

TECHNICAL SKILLS

Applications: SolidWorks CSWP | Onshape | PTC Creo | MATLAB | MS Office | ANSYS | Git | Linux | Python (basic)

Fabrication: 3D Printers (FDM, SLA) | Lathe | Mill | OMAX Waterjet | Laser Cutter | Woodworking | Soldering

Languages: English (native) | Spanish (proficient) | German (beginner)

EDUCATION

B.S. in Mechanical Engineering, Minor in Biomech. Eng. | [Northeastern University](#) | Boston, MA

May 2017

Honors: graduated *magna cum laude* | Dean's List | University Honors Program | Nat'l Hispanic Recognition Program

Senior Capstone Design Project: Automated Control System to Map Material Properties of Cartilage | **Team Lead**

RELEVANT EXPERIENCE

Team Mentor | [FIRST Robotics NUTRONS Team 125](#) | Boston, MA

2013 – 2017

- Taught STEM principles and skills to team of ~40 high school students within the FIRST program
- Guided students in designing assemblies with PTC Creo and machined precise components on lathe and mill
